

Spring forth University (SpU) Food Bank Analysis

Accommodation

Off Campus **843**

On Campus **245**

Employment status based on age

Age 16 - 21 21 - 30 31 - 40 41 - 50

Students that skipped meals

Employed Self employed Unemployed

Students that were hungry in past 12 months

Age 16 - 21 21 - 30 31 - 40 41 - 50

- Almost one-third of the students stay off campus, incurring transportation expenses. and these ones have to spend money on transportation. The analysis shows that even the students that reside on campus are affected by lack of food.
- Most of the students without employment fall within the age brackets of 16 to 21 and 21 to 31.
- More than half of the students that skipped meals are unemployed.
- Likewise, most students between the age of 21 and 30 were hungry in the last 12 months.
- Considering the impact of these factors on student performance, most responses indicate "sometimes true" and "often true," or "strongly agree" and "agree." This underscores the significant impact of food scarcity on students' academic pursuits. Therefore, establishing a food bank on campus would provide convenient access to food for both on-campus and off-campus students.

How food affects comprehension

Shared accommodation to reduce cost

Shortage of food with no money

How hunger impacted effectiveness
